## Encoder

Encoder provides

words sorted into

(Transformers can derive a

see (Weiss et al 2021))

noun,verb,other order

sorted seguence from a seguence

and it is natively supported in RASP

v\_unacc\_pp: 20

scientist cat donut

A scientist lended a cat a donut beside a computer

0 1 23 45 6 78 9 A scientist lended a cat a donut beside a computer

beside (6,9)

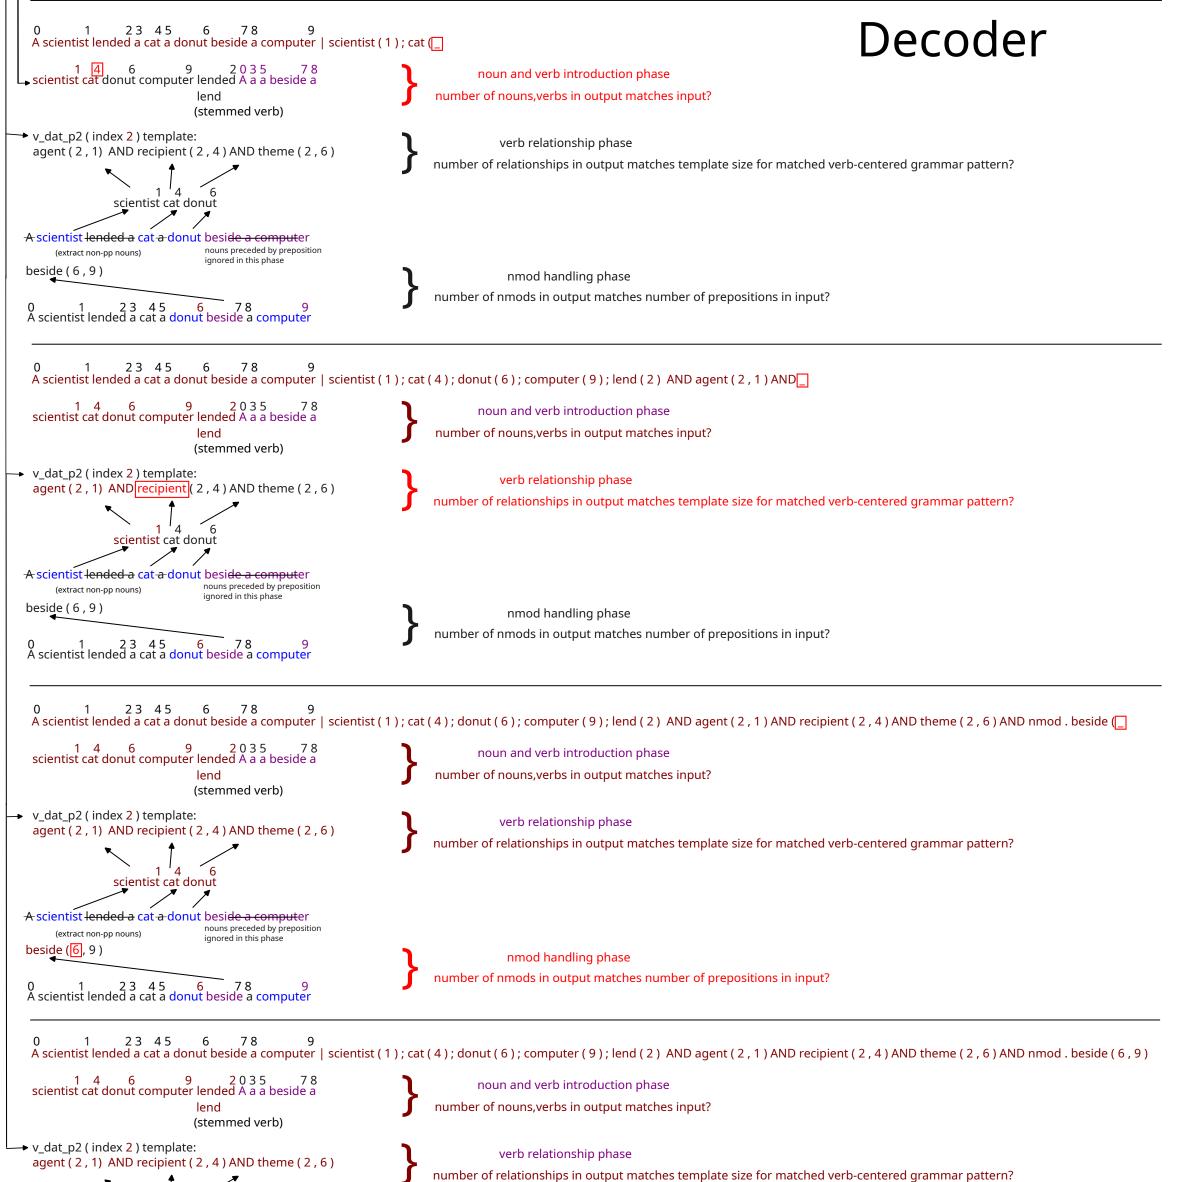

nouns preceded by preposition ignored in this phase

Encoder attempts 19 flat pattern matches at once (matching v\_dat\_p2 shown here) 0 0 1 0 0 0 0 1 7 18 1 7 1 7 np v\_dat\_p2 np np after np 1 7 18 1 7 1 7 1 7 18 1 7 1 7 1 7 18 1 7 1 7 1 7 18 1 7 1 7 . 1 7 18 1 7 1 7 1 7 18 1 7 1 7 np det left before np 7 1 7 7 det: 1 embed to pp: 2 part-of-speech was: 3 A scientist lended a cat a donut \* and verb-type by: 4 to: 5 In bidirectional Encoder that: 6 = [0, 0, 0, 0, 0, 0, 0] np\_prop\_seq common\_noun: 7 v\_dat\_seq = [0, 0, 1, 0, 0, 0, 0]Encoder-Decoder proper\_noun: 8 np\_det\_left\_seq = [1, 0, 0, 1, 0, 1, 0] np\_two\_before\_seq = [0, 1, 0, 1, 0, 0, 0] Transformer v\_trans\_omissible: 9 np before seg = [0, 0, 1, 0, 1, 0, 0]equivalent model v\_trans\_omissible\_pp: 10 np\_after\_seq = [0, 0, 1, 0, 0, 1, 0] v\_trans\_not\_omissible: 11 v\_trans\_not\_omissible\_pp: 12 (A) = (np\_det\_left\_seq & np\_two\_before\_seq) = [0, 0, 0, 1, 0, 0, 0] v\_cp\_taking: 13 (B) = (np\_prop\_seq & np\_before\_seq) = [0, 0, 0, 0, 0, 0, 0] v\_inf\_taking: 14  $np_np_seq = (A \text{ or } B) = [0, 0, 0, 1, 0, 0, 0]$ np\_np\_any\_before\_seq = [1, 1, 1, 0, 0, 0, 0] v\_unacc: 15 np\_v\_dat\_p\_np\_np = np\_after\_seq & v\_dat\_seq & np\_before\_seq & np\_np\_any\_before\_seq = [0, 0, 1, 0, 0, 0, 0] v\_unerg: 16 v\_inf: 17 v dat: 18 v\_dat\_pp: 19

\*COGS official training data uses "lended",

instead of "lent"
